The Problem

To Inform Decisions, Public and Private Organizations Need to Work With Multiple Streams of Data.

Merging, Matching, Visualizing, & Analyzing Multiple Data Streams is Costly.

Randomized Experiment with 70 subjects

(professional data scientists, 92.5% with advanced degree)

Dataset with salaries, experience, and accomplishments of 1000 professors in a hypothetical university

Do you expect a gender wage difference favoring men or women?

90% said Men

Did the data confirm or reject your hypothesis? (reject was right answer)

57% Excel users were correct*

80% DIVE users were correct

*the average subject has used excel for +11 years and +5 hours a week. Nobody was familiar with DIVE before the experiment.

Analytics + Integration:

Does commuting alone correlate with higher obesity?

Obesity Data: Department of Health.
Commute Time Data: Department of Transportation.
Income Data: Ministry of Economy or Finance.
Demographic Data: Census or Survey.
